

Optimyst Stove

FREESTANDING ELECTRIC STOVE

RTOPSTV

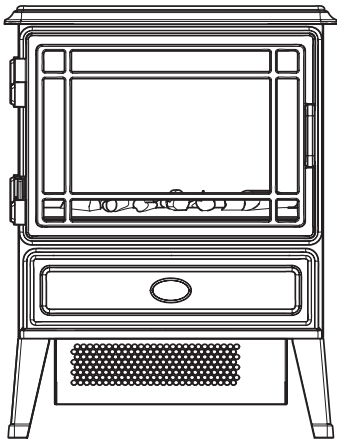

This is a beautiful electric stove, based on a classic cast-iron design. With a contemporary matt black finish and a working door; it's a look to suit any interior scheme. The Dimplex Optimyst stove is a smart alternative to a gas or wood burning fire and is suitable for many rooms including the lounge, dining room and conservatory.

This electric fire features Optimyst 3D flame effect which can be used with or without heat, which instantly adds an inviting, warming glow to the room. This fire can be operated by the manual controls located on the unit or the easy to use remote control. Optimyst uses ultrasonic technology to create the world's most realistic flame effect, with an ultra-fine water mist that mimics flame and smoke. As the mist rises through the logs, warm light is emitted which reflects against the water, creating an incredibly realistic 3D illusion of flames and smoke which is commonly mistaken for the real thing.

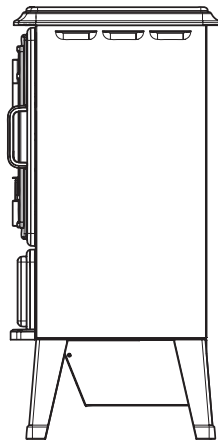

Thermostatic controls mean you can set your fire to produce heat when the room drops to a certain temperature, helping to maintain comfort in your home.

Optimyst Stove

W 480mm

D 300mm

H 620mm
