

Bramdean

FREESTANDING ELECTRIC FIRE

BMD20

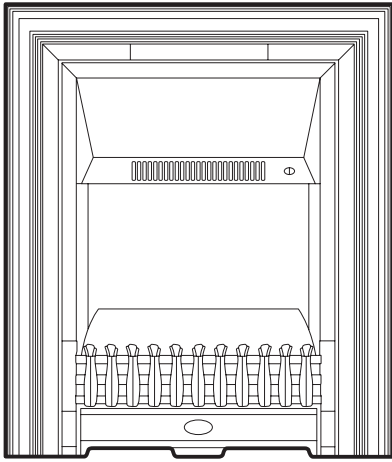

The Bramdean Optimyst freestanding electric fire looks deceptively real. Using patented Optimyst 3D flame technology, it will captivate you from the moment you see it.

The combination of ultra-fine water mist and special lighting creates a convincing illusion of flames and smoke. Bramdean is a freestanding fire which means that it can fit “flat-to-wall” with no inset depth required and can also be installed within a fire surround.

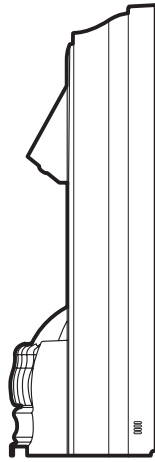

With classic styling, a dashing brass finish, coal effect fuel bed and thermostatic controls which allows you to set your fire to produce heat when the room drops to a certain temperature, helping to maintain comfort in your home. Providing up to 2kW heat output with a choice of manual or remote control which allows you to control the heat and flame intensity, the Bramdean is packed full of features you will love.

Features

Unique Optimyst effect

An authentic and unique three dimensional flame and smoke effect created by lights reflecting against ultra fine filtered water mist.

2kW heat output

Offering up to 2kW of heat via a fan heater.

Choice of 2 heat settings

A choice of 1kW or 2kW heat output helping control running costs.

Thermostat

Maintains the desired room temperature by automatically switching on and off.

LED lighting

Efficient low energy and long lasting LED bulbs.

Remote control

Operate the fire from the comfort of your armchair.

Real coal fuel bed

Complete the look of a real fire with the realistic coal fuelbed.

Flame effect only

Enjoy the ambience of the flickering flame effect any time without the heat.

Freestanding

Quick and easy to install - sits flush against a flat surface such as a hearth or wall.
