## Declaration of Conformity

I confirm that on behalf of Gallery Direct, all items supplied comply with all relevant legal regulations to be placed onto the UK market.

All relevant items conform to the requirements of the Furniture and Furnishings (Fire Safety) Regulations 1988 (as amended in 1989, 1993 and 2010) and some items (applicable as labelled) also comply to BS 7177:2008 Low **OR** Medium Risk categories under fire safety regulations.

All items supplied comply with the REACH and POP regulations and the general product safety standards. The material content of items are as stated on the product attributes information.

They are suitable quality and build for the intended use including outdoor where applicable and intended.

All of our products containing timber conform to the UK Timber Regulations (UKTR) and are verified through our third party, Quality Solutions Ltd (QSL). Gallery Direct and QSL work with all our suppliers to achieve a negligible risk status for all timbers or timber-based products used.

Gallery Direct has a robust New Product Implementation and Quality procedure that all items pass through before leaving our factories or that of third-party partnerships. All items have a specification sheet produced outlining item characteristics and technical data as well as all labelling and packaging requirements. These are issued to the manufacturer as well as third party or internal QC teams.

A sample of production is reviewed during manufacture and again on arrival to the UK. No product leaves the manufacturing site without the inspection taking place and the report being reviewed and approved to ship by the UK Quality Team. Random sampling of stock also takes place on arrival in the UK and full inspection takes place for quality issues.

Signed For and On Behalf Of Gallery Direct Ltd on 13/03/2025

Neil Branchett  
Compliance & QC Manager
