How to install Laura Ashley pre-drilled glass splashbacks

Clear Silicone Sealant - Low Modulus Type

Sealant Gun

Clean Cloth

Splashback plus 4 x screws & 4 x wall plugs (supplied)

Check that your splashback fits the space. This Will depend on size of splashback ordered and your preferred orientation.

110mm

Your splashback must be at least 110mm away from the nearest heat source.

Check the surface is perfectly flat, non-porous, dry and dust free.

> Do not cut: Our splashbacks are made from high quality toughened glass so cannot be cut

Decide Where you Want to position your splashback, then carefully and accurately mark where the drill holes need to be. Select the correct sized drill bit and determine depth of hole required. Once drilling complete, insert Wall plugs firmly into holes.

Place the bottom edge of the splashback to the rear of the hob, lining up the pre-drilled holes with those on the Wall. Insert the screws and fix to the Wall

Use the Clear Silicone Sealant to seal around all four sides of the splashback. Take care to ensure that the sealant is no more than 2.5mm in thickness.

LAURA ASHLEY

SINCE 1953

WARNING

SAFE HANDLING OF GLASS

We recommend that glass splashbacks are handled with care and that eye protection and suitable gloves should be worn. We advise that the product is brought to room temperature over a period of 24 hours if it has been subject to very hot or cold conditions beforehand.

IMPORTANT

Unfitted glass is fragile. Do not place on hard surfaces prior to fitting. Special care should be taken with the corners of the product as impact will cause the alass to shatter.

- (1) Simply use hot water and a mild soap detergent to clean the glass splashback. Do not use abrasive cleaners.
- 2 Leave the splashback for at least 45 minutes to cool before wiping as in extreme cases applying a cold cloth to a hot surface can cause the glass to crack/shatter.

All our glass splashbacks are guaranteed for 5yrs. For more information, yisit www.splashback.co.uk/terms.htm

Thank you for purchasing this splashback.

We'd love to see your transformation. Why not take a photo of the space before and another once your splashback is in place, post on Instagram, and tag us @lauraashleyuk
