Planning your GoodHome Atomia storage

Atomia cabinets form the building blocks of your new storage. Cabinets come in five heights (each one a multiple of 375mm), three depths and four widths.

Once you've measured your space, start by finding the depth that works for you. Then choose the width and height of the cabinets according to what you want to store.

Atomia cabinets can be wall mounted or freestanding, with or without adjustable feet. When adding feet, always remember to include this in any measurements.

Bespoke made to measure

With an extended range of styles, colours and finishes, our made-to-measure sliding doors can be customised to suit your space, ensuring a perfect fit.

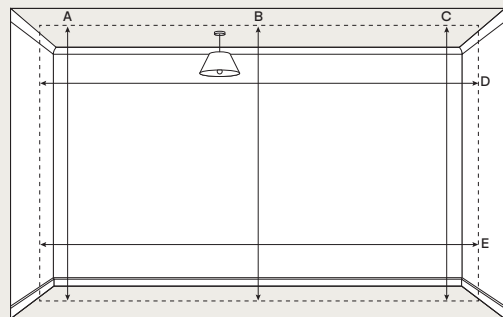

Shown: Minimalist 1 panel sliding doors, dark blue glass with silver effect frame and Relax modular storage.

How it works

Our made-to-measure sliding doors are built to suit your space, using the measurements you provide. They can be designed to fit any opening between 1200–2480mm in height and 1100–4550mm in width.

Start by measuring the lengths marked A–E on the diagram. We recommend taking these measurements from 620mm from the back wall to allow space for your storage system. All doors and tracks are manufactured to the smallest measurements, ensuring a perfect fit.
