Be smart with your space

Awkward-shaped rooms can leave you with unused space and empty corners. But, with some planning and the right furniture, you can get the most out of your home's quirks.

Space and storage solutions

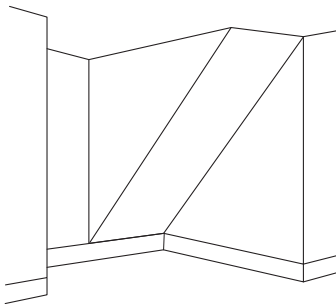

Planning

When you're ready to start your project, measure your space. As a guide, we recommend measuring the lengths marked A-H below.

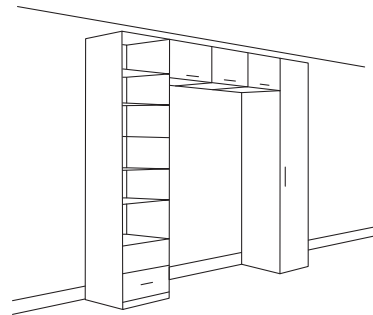

Tricky spaces

Whether you have sloped ceilings or irregular corners, clever modular furniture will put unusual spaces to work.

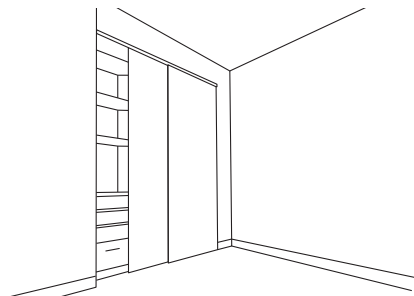

Floor to ceiling

Maximise unused space above beds and desks with tall cabinets from the Atomia range.

Alcoves

Choose sliding doors that can be customised with internal storage, modular shelving and more.

Good to know

Measure the length, width and height of your room, noting any pipework that's boxed in or under the floor and marking doors and obstacles. Book a free planning appointment at diy.ie/planningappointment

Build it your way

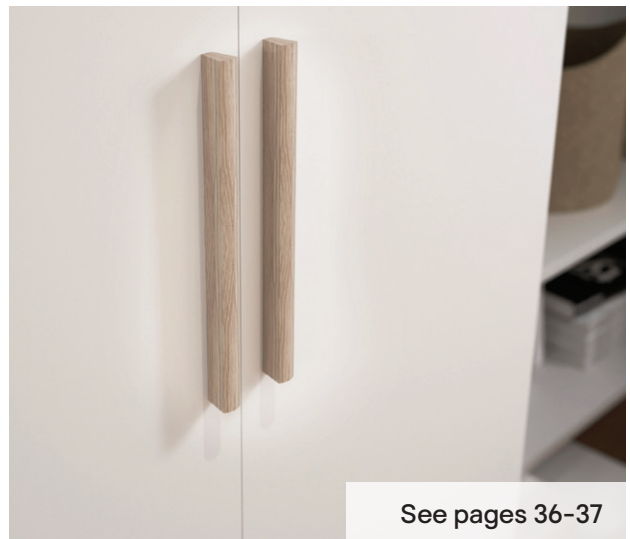

1. Choose your cabinets

Cabinets come in a variety of depths, widths and heights, so they'll always fit your space. Stack, connect, and build exactly what you need.

2. Add your internal storage

Divide up your space in a way that suits you. Options include glass-fronted drawers and clever additions like hanging bars and pull-out baskets.

3. Select your external doors and drawers

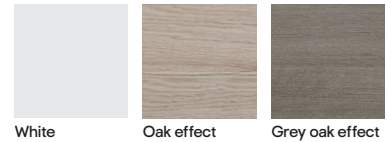

From sliding doors to full-length mirrors, the external look sets the tone for the rest of the room.

4. Pick your finishing touches

Complete the look with handles and feet that work for you and complement your finished design.

Colour options

Atomia cabinets, shelves and internal drawers are available in three colours. If you're planning on enclosing your storage, fixed and sliding doors come in an extended range of finishes. See page 30 for standard doors and page 32 for sliding doors.

Planning your Atomia storage

Atomia cabinets form the building blocks of your new storage solution. Cabinets come in five heights (each one a multiple of 375mm), three depths and four widths.

Once you've measured your space, start by finding the right depth that works for you. Then choose the width and height of the cabinets according to what you want to store.

Finally, don't forget Atomia cabinets can be wall mounted or freestanding, with or without adjustable feet. When including feet, always remember to include this in any measurements.

What is made to measure?

Made-to-measure sliding doors are designed to fit any opening 1200-2480mm in height and 1100-4550mm in width. We recommend measuring your opening space, height and depth, marked A-E. It's best to take these measurements from 620mm from the back wall to allow space for your storage system. All doors and tracks are manufactured to the smallest measurement.
