Alloy Splashbacks come in four sizes, but you're not limited by the size of the panel you buy - it's easy to cut your panels to the size and shape you need.

High Rise Splashback – The 750mm height of the high rise splashback allows you to fill the wall right up to hood height with design whilst being safe in the knowledge they are certified to be there. You don't need to interrupt the design with a different panel type to protect your home

Mid Rise Splashback – The Mid Rise splashback's 600mm height is ideal for use behind a sink, or filling the space behind a hob between worktop and upper cabinets.

For a focused area of design a hob panel is the perfect solution. Choose between two different sizes both with an 800mm height.

Standard Hob Splashback

Wide Hob Splashback

High Rise Splashback

Mid Rise Splashback

Material: MDF

Splashback Sizes: 2440 x 1220mm, 2440 x 600mm

Sheet Thickness: 10mm

Finish: Matt or gloss

Decor Styles

Using Splashwall Decor designs it is easy to create an unforgettable, modern looking kitchen that's practical and low maintenance.

Each Decor style is designed to represent the charm of natural materials but with a much simpler and cost effect installation.

All our Splashwall Decor splashbacks are made using a modern, moisture resistant core, that come with a 15 year product guarantee (when fitted in line with our installation guide)..

Cutting:

Measure your splashback and use a soft pencil on the surface. If you do not wish to mark the surface then put masking tape down first and mark on the tape. This will also help on darker colours to make sure the pencil line is visible. Mark the face if cutting with a handsaw or the back if using a power saw and always double check your measurements before cutting. Remember to allow for any edging to be added.

NOTE: Use appropriate safety equipment such as face mask and eye protection while performing any cutting. Ensure all pieces, including off cuts, are adequately supported.

When using a handsaw the decorative face should be uppermost, keeping the saw at a low angle to ensure the best cut. Ensure that your saw is sharp and well set and has 10/12 teeth per inch. When using an electric saw you should cut the splashback face down.

Cut-outs:

Shaped cut-outs can be formed by drilling 8mm diameter holes in the corners of the required shape and then cutting between using a fine wood jigsaw blade. It is important that the splashback is supported at all times. With all cut-outs a radius of at least 4mm must be left in the corners.

Edging:

Splashwall Decor Splashbacks are not edged. We suggest using splashwall trims to finish exposed edges.

Cleaning:

For general cleaning gently wipe the surface using either a damp cloth or sponge with a mild detergent or non-abrasive cleaner diluted in warm water. It is important to avoid using abrasive scouring powders, creams or polishes.

It is always advisable to wipe off any spillages immediately.

Whilst the surface will resist most household foodstuffs, including coffee and red wine, certain items such as shoe polish, dyes and nail varnish will stain.

Installing:

NOTE: The bottom edge of the splashback, where it meets the worktop should be sealed with Complete coloured sealant to avoid moisture ingress.

NOTE: For installations behind a hob please refer to the hob manufacturers guidelines for fitting suitability and requirements.

NOTE: The splashback should be adhered to the wall with Complete adhesive.

When fixing the splashback, apply Complete adhesive to the back of the splashback in vertical beads spaced 100mm apart. The area directly behind the hob should also have additional vertical beads spaced 20mm apart and at least 300mm high.

Press down to ensure the Complete adhesive is 'squeezed out' and wipe off any excess adhesive immediately, using white spirit.

You may need to push into place if the wall is running off square and hold in place with a combination of clamps and push sticks until the adhesive has set. Once the adhesive is set the installation is complete.

Material: Solid grade laminate

Splashback Sizes: 2440 x 1200mm, 2440 x 600mm

Sheet Thickness: 4mm

Finish: Gloss

Style Shown: White

Our composite range of splashbacks are made from a super strong, waterproof composite, that has a realistic tile embossed effect; giving the look and feel of traditional metro tiles, but minus the hassel of grout!

Shown here in our modern bright White Tile decor.

Larger Runs

For large kitchens, with splashbacks longer than 2440mm required, our panels can easily be butted next to each other.
