<b>Storage</b>	Page 8	<b>Range cookers</b>	Page 14		
<b>Ovens</b>	Page 9	<b>Dishwashers</b>	Page 15		

# Gas and electrical regulations

CE marking on a product is a manufacturer's declaration that the product complies with the essential requirements of the relevant European health, safety and environmental protection legislation.

Choosing an RECI (Registered Electric Contractor Ireland) is a householder's best way to ensure a safe job. All REC's are required to have in place insurance cover and are required to certify all electric work completed by them. Any gas work must be carried out by a registered gas installer.

**Minimum height 216cm**  
Standard larder, including 15cm plinth, without cornice or pelmet

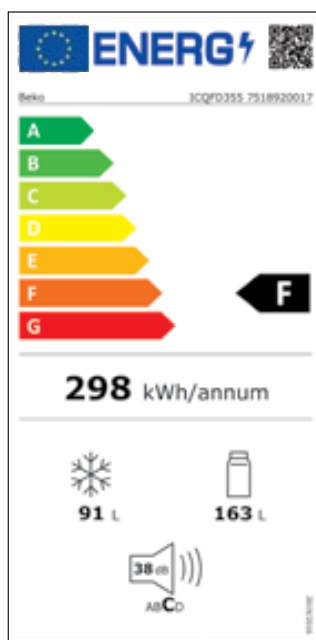

## Remember

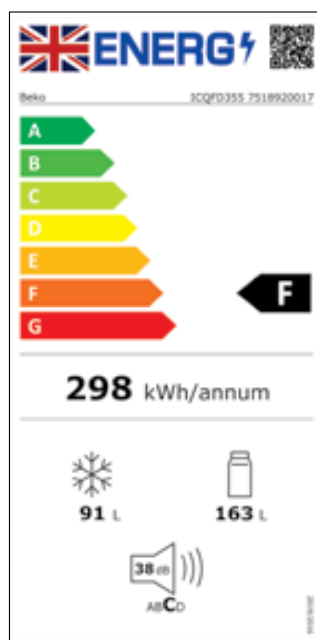

- Hobs should have a minimum of 30cm work surface either side. (Ideally 40cm either side of an electric hob and 50cm either side of a gas hob.)
- Ovens shouldn't be located near entrances or where there is through traffic.
- Electrical sockets can't be fitted within 30cm of a sink.
- Ovens should be separated from adjacent walls or end panels by at least 30cm.
- Gas hobs can't be fitted within 30cm of any window and electric hobs within 5cm.

# New energy efficiency rating for appliances

**New labels** (from March 1st 2021)

Republic of Ireland and Northern Ireland

Great Britain

## Energy efficiency labels

Only dishwashers, washing machines, washer dryers, fridges and freezers will be rescaled from 1 March 2021.

Other product groups carrying EU energy labels will follow in the coming years. These symbols tell you how energy-efficient each appliance is, with 'A' being the most efficient and 'G' being the least.

## Water pressure

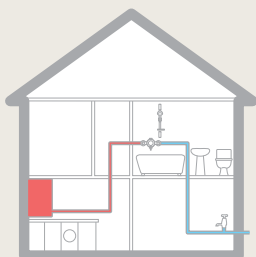

You need to check if you have a high or low pressure water system and choose your tap accordingly. We've created this guide to help you.

### Low pressure water system

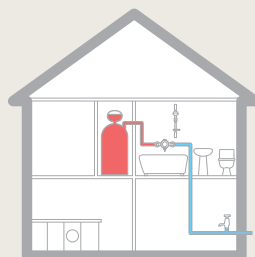

You have a cold water tank in your attic and a hot water tank in your airing cupboard. You can choose any of our low pressure taps (minimum operating pressure of 0.1 – 0.5bar).

### High pressure water systems

1. You have a boiler unit but no hot water cylinder, the boiler unit is usually found in the kitchen and delivers hot water on demand.

2. You have a hot water cylinder with an expansion vessel on top, usually found in the airing cupboard, but you do not have a cold water tank. You should be able to choose any of our taps.\*

### High pressure

Suitable for high pressure water systems only.

### Low or high pressure

Suitable for low or high pressure water systems.

### Manufacturer's guarantee

This varies according to the brand and the model. Your legal rights are not affected. Please see individual manufacturers' websites for guarantee details.

### Single/side lever

Controls temperature and flow with one side lever.

### Ceramic disc valve operation

More hardwearing valves with easier, low friction operation. Available in either 1/4 turn or single lever styles.

\* Please note that mains water pressure can vary and may not always be sufficient for some taps. If you are in any doubt, you can check your supply pressure using a water pressure gauge (available at B&Q).

**Pull out taps must not be directly connected to drinking water supplies without appropriate backflow protection. Please consult your plumber or local water supplier for advice on your specific system.** To comply with the Water Supply (Water Fittings) Regulations (Bylaws in Scotland) and to keep your water supply healthy, please be aware that significant alteration of your plumbing system may be required. GENC 19662

Pull down taps - for installation refer to diy.com

Please note that mains water pressure can vary and may not always be sufficient for some taps. If you are in any doubt, you can check your supply pressure using a water pressure gauge (available at B&Q).

All guarantees are manufacturer guarantees. GoodHome, Cooke & Lewis and B&Q products are covered by our own guarantee. This does not affect your statutory rights. Guarantees vary according to the brand and the model, please see individual manufacturers' websites for guarantee details. See page 18.

## New energy efficiency rating for appliances

New labels (from March 1st 2021)

Republic of Ireland and Northern Ireland

Great Britain

### Energy efficiency labels

Only dishwashers, washing machines, washer dryers, fridges and freezers will be rescaled from 1 March 2021.

Other product groups carrying EU energy labels will follow in the coming years. These symbols tell you how energy-efficient each appliance is, with 'A' being the most efficient and 'G' being the least.

## Energy efficiency labels

Only dishwashers, washing machines, washer dryers, fridges and freezers will be rescaled from 1 March 2021. Other product groups carrying EU energy labels will follow in the coming years. These symbols tell you how energy-efficient each appliance is, with 'A' being the most efficient and 'G' being the least.

### Current labels

### New labels (from March 1st 2021)

\*Price shown includes a €5 contribution towards recycling costs.

\* Available July 2021

All guarantees are manufacturer guarantees. GoodHome, Cooke & Lewis and B&Q products are covered by our own guarantee. This does not affect your statutory rights. Guarantees vary according to the brand and the model, please see individual manufacturers' websites for guarantee details. See page 18.

### This does not affect your legal rights

Prices correct as of 11 June 2021. Prices and availability may have changed since the publication of this brochure. Customers are advised to check current prices and availability in store before purchasing.

Registered office B&Q Limited, Chestnut Avenue, Chandlers Ford, Hampshire SO53 3LE

All guarantees are manufacturer guarantees. GoodHome, Cooke & Lewis and B&Q products are covered by our own guarantee. This does not affect your statutory rights. Guarantees vary according to the brand and the model, please see individual manufacturers' websites for guarantee details.

# Appliances. After sales service

Although we pride ourselves on an excellent track record, very occasionally things do go wrong. If you have a problem with your appliance, you should follow the procedure below, which will ensure we rectify the situation as quickly as possible.

## If a fault develops once your appliance is fitted and it is under guarantee

You may wish to contact the manufacturer direct. They will arrange for an engineer to visit your home – usually within 48 hours – to carry out the necessary repairs. If the appliance is not repairable, they will arrange delivery of a free replacement. Please note this service is only available within the guarantee period. Appliances must be fitted by an installer with the required registration for gas or electrical work, who complies with all current regulations.
