

30A Heavy Duty

Wifi Timer

Please read the instructions fully before attempting installation.

IMPORTANT

This unit should be installed to current IEE wiring regulations.

- Timer must not be mounted on a flammable surface
- Ensure that the timer does not come into contact with any combustible material such as towels or bedding.
- Ensure at least a 300mm airspace is allowed around the timer

Before starting any electrical work please switch off ALL electricity supply.

Installation

1. Switch off electric
2. Prepare cable ends for connection to the terminals
3. Open the cover to the box
4. Remove terminal cover
5. Attach the cables to the relevant terminals ensuring the rubber grommets to the cable entry are in place.
6. Ensure all terminal screws are fully tightened
7. Replace the terminal cover
8. Screw timer to wall
9. Close front cover

Wiring Connections

Neutral = Neutral In & Out

Live = Live In

Earth = Earth

Live Out = Live Out

Any electrical work should be carried out by a qualified electrician – warranty is only valid if installed by UK qualified electrician. You may be required to supply copies of electrician's certificate in the event of a warranty claim.

Ensure the earth to the switched appliance is maintained

Smart Life App

Free download on Apple IOS & Android

Technical Data

- Switching capacity: Max resistive load 30A or 6500w (resistive loads such as hot water or heating elements)
- Max high pressure sodium (HPS) or metal halide lighting capacity is 6 x 600w or 3600w in total due to the high start up current.
- Max compact fluorescent (CFL) lighting capacity is 4500w in total
- Communications: WiFi ISM 2.4GHz; WLAN 802.11 b/g/n

Please note: at maximum load the relay contact life will be shorter that if used at lower loadings.

UKCA Information

Complies with European Norm
EN 61058-12002 +A2:2008

Switches for Appliances: General Requirements and European Directives: LVD; EMC; RoHS; RED

Guarantee
