

Contents of parcel is 5 strips of corten steel edging with 5 connecting pegs.

CorTen will be delivered 'non-rusty' and will rust when left outside. Depending on weather conditions this can take a few days or a few weeks.

You will need

Gloves

Block of wood

Mallet / Hammer

Lengths can be bent to 90 degree angle if needed its extremely flexible and will easily curve to virtually any radius. Just bend the strips over a Table or work bench or use a block of 4 x 2 timber wood To bend,

No need to cut strips, If you need a shorter length to fit to a space just place one strip behind the other and place a joining peg over the top hold in place.

## INSTRUCTIONS FOR INSTALATION

Place the strips flat along the area you plan to place them

Push the spikes into the dirt and knock into the dirt with a block of wood and a mallet until the Holding spike is fully in the dirt and not visible.

Leave a small gap and place another strip next to it and repeat the process

Then place a joining peg over the gap between the 2 strips and fix into dirt making sure both strips are attached to the joining peg .
