

Resetting and Pairing the Portal:

Turn Off the Portal:

- Locate the switch on the back of the Portal device.
- Flip the switch to the "O" position.

Wait 3 Seconds:

- Allow a 3-second pause.

Turn on the Portal:

- Flip the switch on the back of the Portal device to the "I" position.

Cycle LED Lights:

- The Portal will cycle through three colors: Dark Blue, Purple, and Light Blue.

Battery Life Indicator:

- The Portal will flash a "Green" light twice to indicate its battery life status.

Tap to Reset:

- When the "Green" light starts flashing, tap firmly on the bottom panel continuously until a reset occurs.
- This may take between 15 to 30 taps or 10 to 20 seconds.

Reset Confirmation:

- Once the reset is successful, the Portal will cycle through dark blue lights.

Pairing Mode:

- The Portal will be ready to pair with a new device when it starts flashing a "white" light.

Troubleshooting:

- If the Portal does not reset after following the steps, turn the Portal off and try again.
- Possible issues that could have occurred include:
 - Not tapping quickly enough.
 - The Portal was already reset.
 - Batteries may need to be changed.

Using the GelBlaster Nexus App:

Open GelBlaster Nexus App:

- Launch the GelBlaster Nexus App on your device.

Add Device:

- Select the Portal symbol in the upper right-hand corner of the app.

Pair the Portal:

- Choose "Add Device" within the app.
- The Portal should appear as an available device for pairing.

Refresh if Needed:

- If the Portal doesn't appear, you can try refreshing the page or search function within the app.
