UAP Slim Black Pull Handle

The UAP Slim Black Pull Handle. Discover the allure of the Black Pull Handle from UAP - a contemporary marvel that seamlessly marries style with longevity. Meticulously crafted from marine-grade stainless steel, this handle boasts a high-quality, enduring black powder coating, promising a lasting charm that requires minimal upkeep. Our modern design in Black finish effortlessly merges traditional pull handle elements with a sleek stainless-steel aesthetic.

Innovative Design

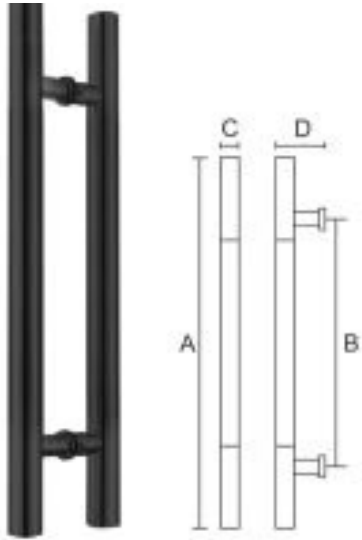

Perfect for residential and commercial settings, the UAP Black Pull Handle is more than just a functional fixture – it's a testament to craftsmanship and refined taste. With its innovative design and top-tier materials, this handle promises to remain a fresh and eye-catching addition for years. Explore the perfect fusion of form and function with UAP, where enduring style meets exceptional durability.

3 Different Fixing Methods

Using a 32mm bar against a 32mm straight bar gives a sleeker and more stylish product. The bolt through fixing gives a neater finish and as Stainless Steel 316 is used, the product will not rust and so there will be no leakage if it rains. Each straight pull handle comes with an Allen Key and 2 Allen Bolts on each of the up-stands. The bolts are all made from high grade stainless steel. All the pull handles have two fixing points with an individual plate on each. What makes the straight pull handle really stand out is the 3 different fixing methods available - hidden fixings, bolt through and back-to-back fixings. Due to the fixing methods, customers also have the option of sending the door to the site without the pull handle on, this will prevent damage in transit or on site. The door will simply be sent with the fixings on, and the installation would be completed on site.
