

Installation Instruction

Bubble Hanging Water Wall with Colour Changing LED Lights

Installation Instruction

Step 1

Decide which wall you wish to hang your bubble wall fountain.

Remove, air-pump kit, transformer and metal bracket out of the frame.

Step 2

Fix the metal brackets into place. As if you were hanging a picture frame.

Step 3

Insert the air stones into the bottom of the acrylic panel and connect the air pipe coming out from the air holes of the Air-Pump.

Step 4

Check the acrylic panel is hooked securely onto the black brackets of the frame.

Step 5

Thread the transformer cord through the opening at the bottom of the frame and plug the air-pump and controller into transformer separately.

Bubble Water Wall With Colour Changing LED Lights

Step 6

Add water from the top of the acrylic panel.

Note: Make sure the RED valve at the bottom is turned off.

Check the blue air-stones are secure, by securing them you are ensuring that it won't leak. We recommend distilled water for your bubble fountain.

Step 7

With help, you can now hang it on your wall.

Step 8

Plug in the transformer.

Step 9

Make sure the air-pump is dry at all times

Make sure sensor remains dry.

2 People are required to help install this feature.

MAINTENANCE

Please ensure you maintain the feature by replacing the water once every three months.
