

Mini Solar Fairy on a Clam Shell with Led Lights

1. Place feature on a level surface at the desired location.
2. Position the fairy on top of the shell and connect the water tube to the flower.
3. Take the flower shaped copper tube and pass through the fairies hands and feet.
4. Connect the pump to the water tube and place the pump within the clam shell resevoir. Ensure that the pump cable pass through the hole at the bottom of the shell.
5. Connect the pump cable to the pump socket and light cable to the light socket on the controll panel on the back of solar panel.
6. Install the 4 pcs AA size rechargeable batteries into the battery case on the controll panel on the back of solar panel.
7. Fill the feature with water ensuring the pump is fully submerged. Press the "Solar ON/OFF" button, then the water will start to flow in minutes, and lights will be shining instantly.
