

Ultrasonic Pest Control – Single Room - Instructions

Installation

Simply plug the unit into a standard 3-pin plug outlet in the affected area. The red light on the front of the repeller will light up indicating that the repeller is functioning.

How to get the best from the unit?

Leave the repeller plugged in continuously.
Make sure that food and anything else likely to encourage the pests are stored away in cupboards and in sealed containers.
Do not place the unit behind furniture or curtains.

Important

For Indoor Use only
Do not use in near water or in a damp area, for example a cellar
Do not place near heat sources
Do not cover the repeller, please allow good ventilation around the unit.

What area will the repeller cover?

This repeller will cover an area of up to 400sq ft in the room it is plugged in.
For larger areas use more than one repeller.
Please note they only cover the room they are positioned in.
