

100W LED Continuous Strip Light

Long Life Lamp Company

Continuous Run Illumination

LED Continuous run strip tape in 10 metre reel, cuttable when less length is required at points. This is a strip light without gaps between the LEDs with allows for an over all desirable effect and high light levels with a balanced illumination.

Includes Transformer

24v includes transformer, Non dimmable, IP20 tape and transformer, Can be cut at points if under 10 metre length is required. Slim design which is easy to handle around and install.

Warm White

Continuous LED tapes pack in as many COB LED chips in a run with minimum parting between the chips. This method allows a more even and well balanced illumination without compromising on high brightness. Ideally used by professionals for creating eye catching, pro standard linear lighting displays, as they know the dark spots left by standard strip lights flaw the desired effect.
