## Outdoor Bulkhead Light

### Daylight 6500 kelvin Pathway Illumination

**Pathway Illumination** - Traditional Oval LED technology luminaire, designed to look as visually appealing as possible without compromising on high brightness. To note Bulkhead lights are made specifically to produce more light levels as suppose to wall lights. Wall lights are made to give less light but look more aesthetically appealing. If you require more illumination then these are the ideal choice.

### IP65 Exterior Use

**Waterproof** - Rated IP65, oval shape impact resistant poly carbonate light weight bulkhead light, with an opal shade to diffuse the light. Can be used around your home externally or commercial property. High brightness will ensure that dark areas will be well lit. Examples of use can be on wall, garage front, building, garden shed, porch, driveway wall.

### Under Canopy

**Under Canopy** - Energy saving solution for commercial business, only using 15w of power. 1200 lumen light output producing a good amount of bright light in 6500k. Great for using in office entrance canopies. Giving staff enough light to enter and exit safely at night.

### Light Weight Attractive Design

#### *Flush Surface Mounted*

15w integrated LED driver high brightness energy saving solution bulkhead fitting. IP65 rated for outdoor weather conditions, light weight attractive design for modern lighting. Suitable for outdoor applications. Great solution for illuminating alley walkways, garden pathways, garage fronts, porch, building for security at night, under canopy. Easy installation flush surface mount.
