

Wall Light ZLC367B

Long Life Lamp Company

Modern External Lights

Modern

Simplistic design wall light known as modern lanterns. Contrasting black finish with transparent polycarbonate lamp shade. This fixture is indispensable for a modern entrance or terrace area. IP44 - the ZLC367 model is waterproof and suited for outside application. Please be aware that the light fitting is not suitable for sea front areas (non marine).

Clear Shade

Transparent lamp shade cover that allows a clear view of the bulb makes this ideal around your garden for illuminating pathways, as a security light also. Integrated ES/E27 fitting ensures that a bulb for enough light output can be utilized. The light is distributed in a 360 degree beam angle making it practical as a lantern rather than being a show light.

LED Only

This particular modern wall light is compatible with LED bulbs only (not included). Do away with the high power consuming and heat producing bulbs and move to a LED compatible fitting which ensures you buy LEDs only. LED bulbs will ensure you save on running costs and will produce high light levels with next to no heat.

Mains Powered Wall Light
