Up Down Lights

Upwards shining & Downwards, outdoor wall light features die-cast aluminium enclosure in anthracite finish with Polycarbonate lenses. 220-240v mains operated. Up and down lights have a lamp holder at the top and the bottom of the fixture which casts beams of light in an upwards and downwards direction onto the facade of your building. The end result is a fascinating display of ambiance.

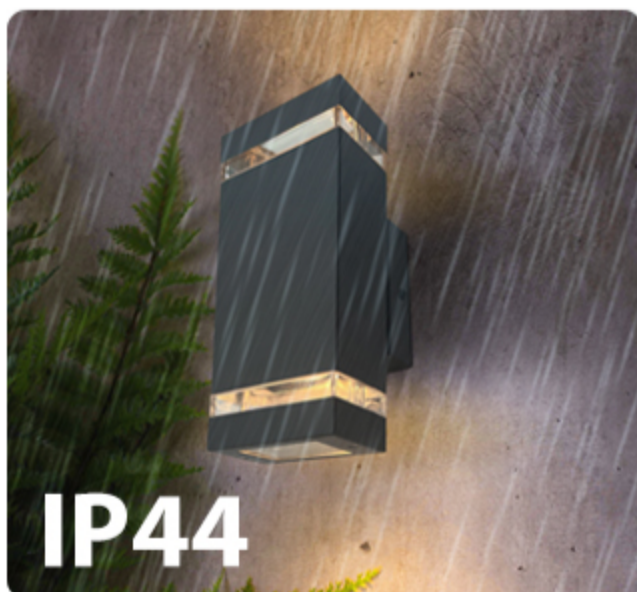

Takes GU10

Ultra modern range of exterior wall-mounted light fittings to illuminate the facade of a building. Anthracite is the choice of colour for someone looking to upgrade their traditional lighting to more trend fowards. Requires 2 x GU10 bulbs Max 35w each side (not included), also works with LED GU10. The choice is yours if you prefer a sharper look to your outside lighting use cool white or a more relaxed atmosphere use warm white.
