UNPACKING YOUR APPLIANCE

Before you use your appliance:

1. Remove all the packaging.
2. Check the appliance after unpacking for any visual damage such as:
 - Misaligned or damaged parts
 - Damage to the controls
 - Damage to the plug or cable
 - If you can see any damage **do not use the appliance**

The appliance should not be used if it has been dropped or there are any visible signs of damage.

This appliance must be placed on a solid stable surface, away from walls, cabinets, furniture, curtains, etc. Position the appliance with minimum spacing of 100cm from the top and sides, front and back.

SAFETY INSTRUCTIONS

When using electrical appliances, basic safety precautions should always be observed, including the following:

- Read all instructions.
- Check that the mains voltage corresponds with the rating on the appliance.
- The appliance must not be left unattended while it is connected to the mains supply.
- This appliance must be positioned upright on the floor away from curtains, furniture or wall coverings and other flammable items.
- Do not touch hot surfaces. Use the handle or the controls.
- To protect against electrical shock do not immerse cord, plug, or appliance in water or other liquid. Do not operate with wet hands.
- Do not let the cord hang over the edge of a worktop, table etc. or touch hot surfaces.
- This appliance must not be immersed.

SAFETY INSTRUCTIONS

- Do not operate any appliance with a damaged cord or plug, or after the appliance malfunctions or is dropped or damaged in any manner. The supply cord cannot be replaced. If the cord is damaged the appliance should be scrapped.
- The use of accessory attachments not recommended by the appliance manufacturer may cause fire, electric shock or injury.
- To disconnect remove the plug from the mains outlet. Do not pull the plug out by the cord.
- Never remove parts from the appliance, such as the feet, screws and so on.
- Never use the appliance near a bath, shower or a swimming pool.
- Never use the appliance on or near hot surface.
- Never move the appliance by pulling the cord.
- Never place flammable objects or clothing on top of the appliance.
- Never move the heater when it is operating. Turn the heater off before moving it.
- Allow at least 15cm safe area around the appliance on the top, at the front and sides to provide good air circulation.
- Prevent overheating of the appliance by keeping the fins clean and free of anything that may cause blockage. Check all fins from time to time for accumulated dust. DO NOT COVER.
- **Warning:** Do not lean, sit or stand on the unit.
- **Note:** There is a protective film of grease/oil on the appliance; this should be wiped away with a damp cloth before use and after initial usage (Ensure you dry the product with a soft cloth or paper towel after it has been wiped).

- **WARNING: In order to avoid overheating, do not cover the heater.** Do not use the appliance in a room with explosive gas such as petrol, or while using aerosols, sprays or solvents.
- The appliance must not be used with an extension lead.
- Do not place any part of your body near the fins, to avoid personal injury, electric shock or fire.

SAFETY INSTRUCTIONS

- If overheating should occur, the built-in overheating safety device will shut the appliance off.
 - Caution: Some parts of this product can become very hot and cause burns. Particular attention must be given when children vulnerable people are present.
 - Do not insert any foreign objects into the grill.
 - Keep all grills clear of any draped fabric or curtains.
 - The appliance must not be located immediately below a mains socket. Do not use the appliance with a programmer, timer or any other device that switches the appliance on automatically. A fire risk exists if the appliance is covered or positioned incorrectly.
 - Do not operate this appliance for any thing other than its intended use.
 - This appliance is not intended for commercial use
 - **This product is intended for household use only.** Do not use outdoors.
 - This product is only intended for heating.
 - **Warning:** It is hazardous for anyone other than a competent person to carry out any service or repair operation which involves the removal of a cover which gives protection against exposure to electrical parts.
 - **Warning:** Children should not use this appliance. Close supervision is necessary when any appliances are used near children.
-
- This appliance can be used by children aged from 8 years and above and persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they have been given supervision or instruction concerning use of the appliance in a safe way and understand the hazards involved. Children shall not play with the appliance. Cleaning and user maintenance shall not be made by children without supervision.
 - Children of less than 3 years should be kept away unless continuously supervised.
 - Children aged from 3 years and less than 8 years shall only switch on/off the appliance provided that it has been placed or installed in its intended normal operating position and they have been given supervision or instruction concerning use of the appliance in a safe way and understand the hazards involved. Children aged from 3 years and less than 8 years shall not plug in, regulate and clean the appliance or perform user maintenance.
 - **Warning:** This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety. Children should be supervised to make sure that they do not play with the appliance.

SAFETY INSTRUCTIONS

- This heater is filled with a precise quantity of special oil. Repairs requiring opening of oil-container are only to be made by the manufacturer or his service agent who should be contacted if there is an oil leak. When scrapping the heater, follow the regulations concerning the disposal of oil.
- Use this heater on a horizontal and stable surface, or fix it to the wall, as applicable.
- **Warning:** Do not use this heater in small rooms when they are occupied by persons not capable of leaving the room on their own, unless constant supervision is present.
- **Warning:** To reduce the risk of fire, keep textiles, curtains, or any other flammable material a minimum distance of 1 metre from the air outlet.

Electrical Safety

THIS APPLIANCE MUST BE PLUGGED INTO AN EARTHED SOCKET

- Before switching on, make sure that the voltage of your electricity supply is the same as that indicated on the rating plate. This product is designed to operate on 220 – 240V AC; 50Hz/60Hz. Connection to any other power source may damage the unit.
- This product may be fitted with a non re-wireable plug. If it is necessary to change the fuse in the plug, the fuse cover must be refitted. If the fuse cover becomes lost or damaged, the plug must not be used until a suitable replacement is obtained.
- If the plug has to be changed because it is not suitable for your socket, or becomes damaged in any way, it should be cut off and an appropriate plug fitted. This should be carried out by a qualified electrician. The plug removed must be disposed of safely, as insertion into a 13 Amp socket is likely to cause an electrical hazard.
- If the supply cord is damaged, it must be replaced by the manufacturer, its service agent or similarly qualified persons in order to avoid a hazard.

Oil Safety

- This heater is filled with a precise quantity of special oil. Repairs requiring opening of oil-container are only to be made by the manufacturer or his service agent who should be contacted in the unlikely event of an oil leak.
- When disposing of the heater, follow the regulations concerning the disposal of oil.

FEATURE DIAGRAM

BASE ASSEMBLY

1. Attach the flat foot to the control panel end of the heater by sliding it in. You will know it is secure when you hear a 'click'.
2. Now attach the other foot to the end fin as shown in the diagram below.
3. Once both feet are secure, check the stability of the heater by standing it on a smooth level surface.

USING YOUR OIL FILLED RADIATOR

1. Before connecting your appliance to the mains socket, position the appliance upright on the floor, at least 90cm away from the wall, away from curtains, furniture or wall coverings.
2. Insert the mains plug into a suitable 13 amp mains socket.
3. Turn the Power Control to the 'I' position. The appliance has 1 power settings.

Power Control Position	AOFR5001 (B)
OFF Power OFF	Off
I Power ON	650W

4. Turn the Thermostat Control to the desired position. It is recommended to select the highest position to pre heat the appliance. It will take 5 -10 minutes for the appliance to fully heat up, the time taken for the heater to heat the room it is located in will be dependent on the size of the room and the ambient temperature of the room. The indicator light will illuminate when the unit is working, but the light will cycle on and off when the thermostat control is set on a low setting and the heater is then maintaining the room temperature.

Note: This appliance will not operate if the thermostat has been set too low.

Note: If the thermostat dial is set toward the highest setting and the power control is set to off then the indicator light will not stay illuminated. No heat will be emitted as the power to the heating elements is off.

USING YOUR OIL FILLED RADIATOR

Note: this appliance will not operate if is not placed on a stable surface.

5. When the room reaches the desired temperature, the radiator will cycle off and turn on again when the temperature drops.
6. If the room temperature falls below the desired temperature, the heating elements will turn on again until the room temperature reaches the desired temperature.

Note: this radiator is oil filled, and will cool down slowly after the power is shut off. Allow the radiator heater to cool prior to any movement, the built in carry handle should be used for easy movement.

Safety Protective Devices - The appliance is fitted with an over heat and tip over protection system.

1. Overheat protection - the power to the heating elements will automatically cut off if the temperature of the heating elements exceeds a certain limit. In the event of overheating, the heater will stop operating. Once the appliance has completely cooled the appliance will then resume operating as normal.
2. Tip Over Switch - The unit needs to be placed on a flat, firm and stable surface to ensure that the appliance contacts the floor firmly and internal tip over switch is level. If in the event that the unit tips over or is placed on an uneven or super very surface the appliance will not operate.

CLEANING AND CARE

WARNING

Electrical Shock Hazard

Before you clean the appliance, disconnect the mains plug from the wall socket.

- Allow the appliance to cool down completely before cleaning.
- Do not immerse cord, plug or appliance in any liquid or allow moisture to come into contact with electrical parts.
- Clean the outer surface using a moist cloth and wipe over with a dry, soft cloth.
- Do not use harsh detergents, abrasives or spray on cleaners.
- Don't allow water to seep into the openings or come into contact with electrical connections.
- Allow sufficient drying time before operating again.
- Clean the air inlets and outlets regularly with a vacuum cleaner using the brush attachment (with regular use, at least twice a year).
- When the appliance is not in use. We recommend that, the heater is re-packed in its original packaging and stored in a cool, dry place.

PROBLEM SOLVING

My appliance does not work when I turn it on:

1. Check that your appliance is plugged in and the power is turned on at the mains socket.
2. Try another mains socket.
3. Check the appliance is in an upright position.
4. Check that the thermostat setting has not been set too low.
5. Check if the Overheat protection has operated by leaving the appliance plugged un and giving it time to cool down. The heater should start to resume operating normally.
6. If the appliance still doesn't work, do not try to repair it yourself.

If your appliance power is automatically cut off, follow the step below:

1. Unplug your appliance from the mains socket and allow it to completely cool down.
2. Inspect your appliance. Clean the air inlet and air outlet with a vacuum cleaner if necessary. If there are any signs of physical damage (e.g. melting, or burning of the case), do not attempt to use the appliance. Please leave all maintenance work to qualified personnel.
3. Plug in the appliance and switch it on again. If it cuts off again, move the appliance to a better ventilated location.

My appliance is rattling

1. This is the tip over switch. It is completely normal.

GUARANTEE AND CUSTOMER SERVICES

This product is guaranteed for **12 months** from the date of the original purchase. If any defect arises due to faulty materials or workmanship, the faulty product must be returned to the place of purchase.

Refund or replacement is at the discretion of the retailer.

The following conditions apply:

- The product must be returned to the retailer with the original proof of purchase.
- The product must be installed and used in accordance with the instructions contained in this instruction guide and any other instructions for use which are supplied.
- It must be used for domestic purposes only and for its intended use.
- This guarantee does not cover wear and tear, damage, misuse or consumable parts.

This does not affect your statutory rights.

CONNECTION TO THE MAINS SUPPLY

This appliance is designed to operate from a mains supply of 220-240V~50Hz/60Hz.

Check that the voltage marked on the product corresponds with your supply voltage.

How to change the fuse

1. Slot the end of a screwdriver into the recess in the fuse holder of the plug.
2. Pull the fuse holder upwards until free of the plug and slide the fuse out.
3. Replace the fuse and replace fuse holder, pushing down until locked into place.

Important: Only ever use a 5 amp fuse.
