

HOW TO APPLY PEEL AND STICK WINDOW FILM

Step 1

Tools for the job!

Step 2

Clean glass thoroughly to remove dirt or dust.

Step 3

Measure the glass.

Step 4

Use grid on backing paper to mark size.

Step 5

Cut the vinyl 2mm smaller than the window, this ensures the vinyl is not touching the edge or seal.

Step 6

Spray the glass with water and a few drops of washing up liquid (not essential but can aid application)

Step 7

Peel away the backing paper.

Step 8

Apply onto the glass and slide the vinyl into place leaving a gap away from the edge. Use a d-c-fix smoother or squeegee to remove any excess water.

Step 9

Dry surface with a cloth, leave to dry completely (the vinyl may go cloudy, this is normal and will dry clear in 1-2 weeks!)
