

The yellow and blue **TUMBLE MAGIC** softening balls have different levels of hardness and different shaped softening nodes. The two **TUMBLE MAGIC** softening balls have been designed so that they work together to lift and separate the laundry whilst tumble drying. **TUMBLE MAGIC** also retains the heat from the dryer and transfers it to the clothes as they tumble, thus aiding the drying process.

Be sure to place both **TUMBLE MAGIC** softening balls in the tumble dryer and operate the machine at the usual setting for your fabrics. There is no need to add a "softening" dryer sheet or use fabric softener in your wash. **TUMBLE MAGIC** use the specially-designed nodes to physically break down the stiffness created by water drying in fabric, thus softening your laundry without the introduction of chemicals.

TUMBLE MAGIC have been scientifically tested to ISO standards at an independent fabric care laboratory and have been proven to:

- Reduce drying time by up to 25%
- Reduce creasing in laundry
- Cut down on lint (waste fluff)

TUMBLE MAGIC also help to soften fabrics.

Please note that **TUMBLE MAGIC** are NOT toys and care should be taken to ensure they are kept out of the reach of children.
