Coverage	10 to 20 m ² per 500 ml pack. Apply 25 to 50 ml of product per m ² of surface
Storage	Store in a cool, dry place, protect from frost. Keep the container tightly closed.
HSE No.	10815
Active Ingredient(s)	Cypermethrin 0.1%, Benzalkonium Chloride 0.1%
Shelf Life	24 months

Application Information

Preparation

When you are experiencing a carpet beetle infestation, **NOPE!® CP Carpet Beetle Killer** is an important part of a control strategy. To ensure a successful treatment consider the following steps:

- Check the eaves and roof space for bird and insect nests and remove them.
- Vacuum and remove debris such as lint, hair, dead insects from airing cupboards, shelves, curtains, carpets and other soft furnishings.
- Lift the carpet and underlay and clean the floor.

The above steps will help deal with the adult beetle. In order to deal with the larvae it is necessary to spray **NOPE!® CP Carpet Beetle Killer**.

Remove any pets from the area, only allowing them back when the treated areas have had time to dry and have been fully ventilated. Leave the treatment to dry for a minimum of 3 hours, but preferably overnight, and ensure good ventilation before reintroducing pets.

Apply a small amount of **NOPE!® CP Carpet Beetle Killer** to an inconspicuous test area of each substrate to be treated (e.g. carpet, sofa) before full treatment commences to ensure compatibility with the substrate.

Application

Read the label before treatment.

NOPE!® CP Carpet Beetle Killer should be sprayed onto hard surfaces and soft furnishings in affected areas.

Using the spray bottle provided at a rate of 25 – 50 ml per metre square. A 500 ml pack should cover 10 to 20 m².

Wash hands thoroughly after use. Keep unprotected people and animals away from treated surfaces until they are fully dry.

After treatment, avoid vacuuming the room for as long as possible – preferably for a minimum of 7 days. This helps to prolong the residual effect of the **NOPE!® CP Carpet Beetle Killer** treatment, ensuring that as large a proportion as possible of the carpet beetle population come into contact with treated surfaces.

NOPE!® CP Carpet Beetle Killer is not to be used on human bedding, pet bedding, pet sleeping quarters, or where pets frequently lie – instead these areas should be thoroughly washed with hot water.

NOPE!® CP Carpet Beetle Killer is not to be used on food contact surfaces.

Prevention

Infestation prevention can be carried out via regular and thorough cleaning of rugs, draperies, upholstered furniture, closets, and other locations where carpet beetles congregate.

Other Information

For full health and safety information consult the safety datasheet (SDS). This product is approved under the Control of Pesticides Regulations (1986) for use as directed. HSE No.10815. Use pesticides safely. Always read the label.
