

INSTRUCTIONS

IMPORTANT! READ AND FOLLOW THESE INSTRUCTIONS CAREFULLY AND KEEP FOR FUTURE REFERENCE

Please read the instructions and warnings carefully before use.

WARNING: This gate is only to be used as a pet barrier. It must not be used as a child safety gate.

WARNING: Incorrect installation can be dangerous.

WARNING: Do not use the safety barrier if any components are damaged or missing.

WARNING: This safety barrier must not be fitted across windows.

WARNING: We highly recommend the use of Wall Cups. If the gate is to be positioned on the stairs, Wall Cups must be used.

This safety barrier is made from steel. Always check that the safety barrier is correctly closed. Sharing these instructions with all other users will support safe operation.

Gate extensions are available in 3 sizes - 6.4cm, 12.9cm and 32.4cm. Extensions can be used to extend the gate up to a maximum of 148cm. "Y" spindles are available for fitting the gate to rounded newel posts.

CLEANING & MAINTENANCE

To clean, wipe with a damp cloth and dry thoroughly. Do not use abrasive or aggressive cleaning agents because they can be detrimental to the health of your child and can affect the finish of the product.

Use a spirit level to routinely check all barrier uprights remain vertical and the top of the gate remains horizontal. Also check that equal pressure is retained across all 4 spindles. Regular checks of the barrier such as these will ensure it remains secure and functions in accordance with these instructions. Additional or replacement parts should only be obtained from the manufacturer or distributor. Careless handling may cause damage.

PRODUCT GUARANTEE

We want you to be 100% satisfied with the quality of our products and service. If at any time you are not satisfied, please contact our Customer Service Team and we will make it right. In addition, we offer a one-year manufacturer's guarantee on our products (please retain proof of purchase).

POSITIONING THE SAFETY BARRIER

A – When used at the top of the stairs, the safety barrier should not be positioned below the top level. When the safety barrier is used at the top of the stairs, the gate should be opened towards the landing and away from the stairwell for safety.

B – When used at the bottom of the stairs it should be positioned at the front of the lowest tread possible.

- Assemble away from children as the fittings pack contains small parts which may present a choking hazard.
- Lay out the parts on a soft level surface and compare to the parts checklist. Do not throw away any packaging until you are sure that you have all the parts.
- You must install your safety barrier in a strong and secure opening and ensure the surfaces are dry, solid and clean.
- When using the adhesive pads to secure the wall cups, apply pressure to the sticky pads for 1 minute to assist the development of adhesives and bond strength. In the event of any movement to the wall cups thereafter, the use of wall screws is required. We supply 4 x Wood Screws with the Barrier.
- Make sure to use the appropriate type of fixings depending on the surface available: wooden screws for wooden surface, multi-use plug and concrete screw for concrete surface, plasterboard wall plug and screw for plasterboard surface, metal screw for metal surface.
- Please note: a Pencil and Spirit Level will be required in addition to this checklist. If you are to secure the Wall Cups with Plugs, you will require suitable fixings for your surface and additional tools.
- Additional gates, panels and spare parts are available at www.safetots.co.uk
