

# Window sticker application guide

1 Slowly peel the window sticker away from the backing paper. Please try to keep the back of the sticker sheet (the sticky side) clean and do not allow the window sticker to stick to itself.

2 Apply the window sticker to the window. First stick down the left hand side, then smooth across the sticker to the right, pressing down with your hand as you go to prevent air bubbles.

3 Reposition the sticker as desired by gently lifting up one corner. Please retain the backing paper if you would like to store your window sticker and use again.

Our window stickers have been tested to ensure they should remove cleanly, however this can depend on a number of factors, many of which are unfortunately beyond our control (e.g. environmental conditions such as humidity and the amount of sun exposure). We cannot therefore guarantee clean removeability and in some cases there may be some residue left on the window when the graphics are removed. This can be cleaned with any domestic window cleaner. Please note that window stickers are decorative items and not toys. Window stickers should be used in positions that are out of the reach of children under 3 years of age: choking hazard.
