

Plush Lawn

Seed & Feed Lawn Conditioning Mixture

Shake n' Rake®

A complete mix of top quality lawn fertiliser and grass seed, designed to condition and thicken your lawn. Ideal for restoring your lawn to its full potential for a perfect, lush, green lawn all year round!

Top Tips For Best Results Every Time:

Sow from March to early October, watering well when the weather is dry. Grass seed germinates best in moist, warm soil. Fine turf fertiliser will release nutrients over ten to twelve weeks. Wait until the risk of frost has passed before using Plush Lawn. Frost will affect seed germination.

For A Perfectly Conditioned Lawn:

1. Mow the lawn as short as possible and remove any weeds and debris.
2. Rake the surface lightly to remove dead grass and reveal any bare patches.
3. Shake the box for 30 seconds before opening to mix the contents well, then open the easy pour tab on the side of the box.
4. Starting at one end, simply shake the box lightly over the whole lawn evenly.
5. Rake the seeds lightly to ensure seeds make good contact with the soil.
6. Water well with a light spray taking care not to wash seeds away.
Keep soil moist until the new lawn is established.
7. When the grass reaches approximately 8cm high mow for the first time.

Autumn Care:

Using a garden fork, spike the lawn about 8cm deep every 15cm.
This boosts grass root growth and improves surface drainage, preventing waterlogging over the winter.

Fertiliser Declaration:

(GB, NI & IRL) Fertiliser
NPK 3-1-3+1FE MiniGran
Nitrogen (N) 3%
Phosphorus Pentoxide (P2O5) 1%
Potassium Oxide (K2O) 3%
Iron (Fe) 1%

Caution:

This product is not for consumption. Contains fertiliser and grass seed.
Keep children and pets off treated area until fertiliser has been absorbed into the ground.
Can cause irritation; wear gloves when handling this product and avoid contact with skin and eyes.
Wash hands after use. Store in cool, dry place away from food products, pets and children.
Remember that birds like to eat seeds, so protect your lawn with netting or like.

Seed & Feed Coverage:

90% Fertiliser with 10% Seed
Application rate to feed & seed:
35 - 50g per m²
Coverage up to 30m²
