C500 Pro Key Safe

Original Police Preferred C500 Pro Key Safe

The C500 Pro Key Safe was designed following extensive consultation with 500 end-users and what they wanted from a key safe.

The C500 Key Safe has achieved the formidable LPS1175 Issue 8 A1, ensuring its place as both the original, most secure mechanical key safe on the market.

The C500 Pro Key Safe has achieved police preference through the official police initiative, Secured by Design.

Anti-theft & robust construction

The C500 Pro Key Safe is made of heavy gauge stainless steel and a thick zinc-alloy shell, with double-wall construction.

A stainless plate around the buttons adds additional security and is scratch and fingerprint resistant. The heavyduty locking mechanism uses a long-travel bolt, making it extremely pry-resistant. A clutch mechanism prevents the handle from being forced open. If the key safe is locked and the handle is turned with force, the handle slips and turns effortlessly without opening.

Approved by home security experts

Following rigorous security and attack tests issued by the Building Research Establishment (BRE), the C500 Pro Key Safe achieved the LPS1175 Issue 8 A1 certification. To maintain the security certification, the key safe must be mounted using the included masonry screws onto a brick or concrete wall.

Thousands of secure code combinations

With over 4,000 possible code combinations, change the code as often as you'd like with the code changing tool included.

How can **C500 Pro Key Safe** be used?

The C500 Pro Key Safe has many applications including access for home healthcare and home services, remote sites, property management, equipment storage, after-hours delivery, alarm or emergency access, secure storage for spare keys, emergency entry and holiday homes.

Installing **C500 Pro Key Safe**

Four heavy-duty, self-tapping masonry screws are included for mounting the key safe on brickwork, concrete, stone and single skin walls.

C500 Pro Key Safe features & benefits

Original police prefereed mechanical wall mounted key safe: Boasts the **LPS1175 Issue 8 A1 certification from Loss Prevention Certification Board** and meets the **'Secured by Design' UK Police Preferred Specifications**.

Accessible: Fully mechanical key safe requires no power or internet connection. Reliable access to your keys 100% of the time.

Spacious key safe design: A large key safe with space to store up to 6 keys and an integral hook for easy access, you can safely retrieve and replace your keys without the hassle of them falling out.

Anti-theft construction: Crafted from thick, hardened Zinc Alloy, the C500 Pro Key Safe has a single-piece construction which makes it extremely attack resistant. Honeycomb design, hardened steel hinge pins, enhance this design.

All weather durability: Rust and water resistant, tested to work in temperatures between -32°C and 68°C. Includes weather-resistant cover made from tough ABS plastic for further protection, designed to be wall mounted outdoors.

Thousands of secure code combinations: With over 4,000 possible code combinations, regularly change your code for enhanced security, using the code changing tool included.

1 key hook: Keeping keys neatly arranged.

Code changing tool: Included in the key safe to easily change your code without additional tools.

Code numbers can be input in any order: As the key safe is a mechanical product, the numbers of the combination can be input in any order. This does not compromise security, as we recommend a code length of 5-7 digits, unlike the standard 4 digits. You have the flexibility to use up to 12 digits in the code.

Easy installation: All fixtures and fittings included as well as simple marking template to ensure correct installation Supplied screws must be used to maintain security standards.
