

Our [Meter Box Plastic Latch](#) is simple and easy to replace, and can be fitted on your existing meter box. Whether you are replacing an [electric](#) or [gas](#) meter box latch, the process is the same. You will need to replace both the latch and lock at the same time if they are damaged. Read our instructions below...

Replacing a meter box latch:

1. Your Plastic latch will consist of three pieces. A plastic latch piece, plastic centre pin piece (triangle key slot) metal washer.
2. Slot the metal washer through the plastic centre pin and thread through the front of the meter door.
3. Take the latch piece and click into place on the inside of the door. Ensure the plastic latch piece is fitted the correct way round with the flatter side facing upwards.
