

IntelRoll INT400 – Half Cassette Retractable Awning

Superior Sun & Rain Protection | Heavy-Duty Design | Adjustable Shade Control

The IntelRoll INT400 Half Cassette Awning is the perfect balance between affordability and advanced fabric protection. It offers better coverage than a no-cassette awning by partially enclosing the fabric when retracted, shielding it from dirt, debris, and weather exposure—extending its lifespan. While it doesn't fully enclose the arms like our INT500 Full Cassette model, it is a cost-effective solution that still delivers outstanding durability and shade performance.

Why Choose a Half Cassette Awning?

- ✓ Better protection than no-cassette models – Keeps the fabric cleaner and safer from the elements.
- ✓ More affordable than full cassette awnings – A budget-friendly option without compromising quality.
- ✓ Robust and stylish design – A sleek finish that blends well with any outdoor space.
- ✓ Versatile shading – Adjust the angle of the awning to suit different seasons and sun positions.

Premium Frame & Construction Details:

- ✓ Frame Colour: Grey (Powder-coated for durability)
- ✓ Torsion Bar: 40x40mm Heavy-Duty Steel for superior strength
- ✓ Front Bar: 88mm x 65mm Aluminium for extra stability
- ✓ Arms: Reinforced Aluminium with dual steel cables for smooth retraction
- ✓ Roller Tube: 70mm Aluminium Diameter for increased durability

High-Quality Fabric for Ultimate Protection:

- ✓ Material: PU Coated 300g/m² Polyester – Water-resistant and UV protective
- ✓ Water Resistance: 17L/m² – Ensures light rain protection
- ✓ Wind Resistance: Rated up to 70N/m² from all angles
- ✓ Certification: TUV & GS Approved for European Safety Standards

Features & Benefits:

- ✓ Perfect for patios, gardens, balconies, and shopfronts
- ✓ Heavy-duty stainless aluminium frame for rust resistance
- ✓ Manually operated for effortless control
- ✓ Easily adjustable angle for optimal shade positioning
- ✓ Retractable design – Open as much or as little as needed
- ✓ Includes all accessories and mounting brackets for easy installation
- ✓ Easy to clean with a simple sponge and cloth
- ✓ One-year manufacturer's warranty on parts

Important Installation & Delivery Information:

Wall Mounting: Must be installed on a solid brick or concrete wall using professional installers.

Bracket Positioning: Pre-marked on the awning for optimal stability and performance.

Additional Support: If the wall structure is weak, use an epoxy resin product for secure mounting.

Delivery Restrictions:

Please note that additional shipping charges apply for deliveries to the UK Highlands, Islands, and Northern Ireland. (Postcodes: GY, JE, IM, TR21-TR25, KW, HS, IV41-IV49, KA27-KA28, PA20-PA80, PH4-PH50, ZE, AB, IV, KW1-KW14, PA21-PA38, PH16-PH26, PH30-PH41, PH49-PH50, BT, PO30-PO41).
