

4 in 1 tap mixer providing the following:

Normal hot and cold water

Boiling water at 98c

Cold water filtered straight from the tap

One of the smallest digital available for easier installation that also provides more cupboard space, The tank will still hold a huge 2.4 litres of water.

Safety child proof boiling water handle for peace of mind.

Unlimited filtered cold water saving money on buying bottled water and reducing plastic waste.

180 degree limited tap rotation allowing maximum reach and flexibility preventing over twisting the boiling water tap feed.

Deck or sink mount (35mm hole required)

Quality brass material with a highly polished finish for years of long life

Spout insulation – keeps the spout cool to touch whilst dispensing boiling water

Quarter turn ceramic cartridges – ease of use and long service life

180 degree swivel spout with aerator fitting – for maximum flexibility and good water flow

Right hand side Hot/Cold water lever – easy to use single lever

Left Hand side safety sprung lock handle – for child and additional safety feature

Opposite twist for cold filtered water

Flexible connecting hoses and tap fixing kit – ease of installation

**Guarantee: Tap 5 years / Tank 2 Years**

### **Dimensions**

Height: 353mm

Reach: 210mm

Spout Width: 28mm

Spout Height: 294mm

Tap hole: 35mm

Minimum water pressure 1.0 bar

Maximum water pressure 5.0 bar
