Grassy surfaces

Cement surfaces

**EN**\_To improve wind resistance, be sure to complete this installation step. If expansion screws or ground nails are not installed, strong winds may topple the gazebo. Expansion screws are essential for stability on cement surfaces, and ground nails are for grassy surfaces.

Ground nails are included in the package while expansion screws are not provided.

**FR**\_Pour améliorer la résistance au vent, assurez-vous de compléter cette étape de l'installation. Si les vis d'expansion ou les clous de sol ne sont pas installés, les vents forts peuvent faire basculer le gazebo.

Les vis d'expansion sont essentielles pour assurer la stabilité sur les surfaces en ciment, et les clous de sol le sont pour les surfaces herbeuses.

Les clous de sol sont inclus dans l'emballage, tandis que les vis d'expansion ne sont pas fournies.

**ES**\_Para mejorar la resistencia al viento, asegúrese de completar este paso de la instalación. Si no se instalan tornillos de expansión o clavos de tierra, los vientos fuertes pueden derribar el cenador.

Los tornillos de expansión son esenciales para la estabilidad en superficies de cemento, y los clavos de tierra son para superficies cubiertas de hierba.

Los clavos de tierra se incluyen en el paquete, mientras que los tornillos de expansión no.

**PT**\_Para melhorar a resistência ao vento, não se esqueça de concluir esta etapa da instalação. Se os parafusos de expansão ou os pregos de solo não forem instalados, ventos fortes podem derrubar o gazebo.

Os parafusos de expansão são essenciais para a estabilidade em superfícies de cimento, e os pregos de solo são para superfícies relvadas.

Os pregos de solo estão incluídos na embalagem, enquanto os parafusos de expansão não são fornecidos.

**DE**\_Zur Verbesserung der Windbeständigkeit, stellen Sie sicher, dass dieser Montageschritt abgeschlossen ist. Wenn keine Dehnschrauben oder Erdnägel angebracht werden, kann der Pavillon bei starkem Wind umkippen.

Dehnungsschrauben sind für die Stabilität auf Zementoberflächen unerlässlich, während Erdnägel für grasbewachsene Oberflächen geeignet sind.

Erdnägel sind in der Verpackung enthalten, während Dehnungsschrauben nicht mitgeliefert werden.

**IT**\_Per migliorare la resistenza al vento, assicurarsi di completare questa fase di installazione. Se non si installano le viti a espansione o i chiodi a terra, il forte vento può far cadere il gazebo.

Le viti a espansione sono essenziali per la stabilità delle superfici in cemento, mentre i chiodi a terra sono indicati per le superfici erbose.

I chiodi a terra sono inclusi nella confezione, mentre le viti a espansione non sono fornite.
