PLANTING SERVICE

At Just Pleachy, we take pride in sourcing the finest trees from top-rated nurseries and growers, ensuring you receive superb quality at great prices.

The success of your pleached trees depends on proper planting and care techniques. We offer a comprehensive online guide to walk you through each step, but if hands-on planting isn't your preference, our **expert planting service** is here to make it easy for you.

To provide our expert planting service, Just Pleachy partners with trusted contractors, a dedicated team of hedging experts with extensive experience in pleached tree planting.

Our planting service includes:

- Tree planting session (suitable for up to 15 pleached trees)
- Tree staking kits
- Irrigation hosing
- Fertiliser

This service can be added to most tree orders. Please note that our planting team is based in Norfolk. While we cover most of England, we can't offer this service for all postcodes or gardens. Larger, heavier trees may need additional heavy-duty staking. For orders of 15 or more trees, an extended planting session will be required. If you're located beyond a three-hour radius of Norfolk, please contact us before purchasing this service.

Call 0330 818 7142 to arrange a custom order.

Not sold separately: This can only be purchased when placing a tree order.

STAKING KITS

If you are planting the trees yourself, we do recommend our tree staking kit includes two stakes and rubber ties. If you are using your own gardener to plant the trees, they may have their own or you can order from us.
