PROTECT YOUR TIMBER SLEEPERS FROM MOISTURE, ROT, FUNGAL DECAY, AND LONG TERM WEATHERING

WEATHER PROOF

UV STABLE

SELF SEALING

YOUR NEAREST MERCHANT:

WALTHER STRONG®

STEP 1

Measure & tear tape to desired lengths

STEP 2

Position on Sleeper
(ensure exposed area is totally covered)

STEP 3

Install Sleepers at desired positions

Protect your timber sleepers at their most vulnerable point — where they meet the ground. Sleeper Tape creates a waterproof, weatherproof seal that guards against moisture, rot, fungal decay, and UV damage.

Quick to apply with a peel-and-stick design, it's more durable and longer lasting than bitumen paint, saving you time and effort. Suitable for both treated and untreated timber, with a 25-year bond guarantee and extreme temperature resistance from -40°C to +93°C.

Note: Suitable for smooth timber only, for incised timber please use HD Sleeper Tape.

200MM X 20M

[small vegetable patch]

250MM X 20M

[large growers]

300MM X 20M

[bespoke designs]

- ✓ Non-butyl & easy-to-tear
