ENGINEERED TO OUTLAST YOUR POSTS

PROTECTING YOUR POSTS FROM WATER INGRESS AND UV DAMAGE FOR DECADES

WEATHER PROOF

UV STABLE

SELF SEALING

YOUR NEAREST MERCHANT:

WALTHER STRONG®

STEP 1

Measure & tear tape to desired lengths

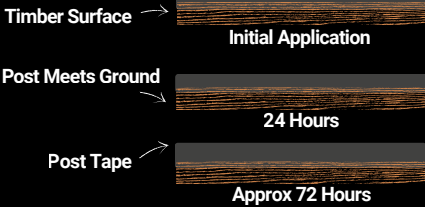

STEP 2

Position on post (50mm above and below ground level)

STEP 3

Install posts at desired depths

Post Tape becomes gradually stronger over 24-72 hours as the adhesive soaks into the timber and fully cures.

- Protects and seals your fence posts at the critical points which are **just above** and **just below** ground level.
- This prevents the damaging elements of moisture, oxygen, fungi and UV weathering on your post.
- Works alongside all chemical treated and non-chemical treated wood.

Note: Post Tape is for smooth timber only, for incised timber please use HD Post Tape

WHAT WILL YOUR POSTS LOOK LIKE IN 5 YEARS?

- ✓ Non-Butyl & Easy-to-tear
- ✓ Completely UV Stable
- ✓ Water-tight & weather-proof

- ✓ Self Seals Around Fasteners
- ✓ Can apply to damp timber or below freezing
