HOW-TO CREATE A SHABBY CHIC LOOK

with Rust-Oleum® Chalky Finish Furniture Paint

1. Select your furniture

Rust-Oleum® Chalky Finish Furniture Paint is perfect for all furniture types, old and new - whether it's a piece you already own or a second-hand find.

2. Paint your furniture

Apply your chosen colour by brush, roller or spray. When using the brush paint, achieve a no brush mark, flawless finish with a mini foam roller.

3. Distress the finish

For a shabby chic look, wait until the paint is dry, then dampen a cloth and rub away the paint on the edges and details to reveal sections of the original finish. Remove the paint in areas that will naturally get knocked and worn for an authentic look.

4. Add the finishing touch

Protect the finish with clear Rust-Oleum® Furniture Finishing Wax for a vintage feel or clear Rust-Oleum® Furniture Lacquer for a harder wearing finish. Consider replacing handles and knobs to complete the look.

Tip

For a more distressed effect use a 180 grit sandpaper to sand edges and details instead of a damp cloth.

CREATE A METALLIC DISTRESSED LOOK

with Rust-Oleum® Metallic Finish Furniture Paint

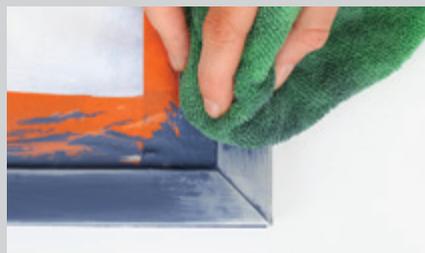

1. Mask

Using masking tape, mask off the areas you don't wish to be painted ensuring the surfaces are smooth, dry and free from contaminants.

2. Paint

Apply 2 coats of Rust-Oleum® Metallic Finish Furniture Paint to produce a pure metallic finish. Allow time for it to dry then add a top coat of Rust-Oleum® Chalky Finish Furniture Paint.

3. Distress

Once fully dry, distress detailed areas of your furniture with a damp cloth to reveal sections of the metallic basecoat.

4. Protect

Apply a coat of Rust-Oleum® Furniture Finishing Wax in Clear with a clean dry cloth to seal and protect the painted finish. Buff the surface to a soft sheen with your remaining clean dry cloth.

CRACKLE

125ml (brush)

Basecoat

Topcoat (Gloss)

Create a vintage, crackled paint effect by applying this special two component system in conjunction with a matt emulsion.

- Two part crackle effect.
- Interior use only.
- Apply by brush only.
- Follow the application process on the back of the can carefully as it is crucial to creating the effect.
- The Basecoat creates the crackle effect and the Topcoat is a clear sealer.
- See 'How-To Create a Crackle Effect' for instructions on how to apply.

HOW-TO CREATE A CRACKLE EFFECT

with Rust-Oleum® Crackle

MATT EMULSION
COLOUR 1

CRACKLE
BASECOAT

MATT EMULSION
COLOUR 2

CRACKLE
TOPCOAT

STEP 1

Ensure the surface of the object you are painting is smooth, clean and suitably primed if needed. Apply your first colour of matt emulsion. Always use water based emulsion paints for the overall effect to work properly. The first colour of emulsion should be brushed out in the same direction as this determines the directional lines of the crackle.

STEP 2

Leave the first colour of emulsion to dry. Stir the Rust-Oleum® Crackle Basecoat then brush this on in the same direction as the emulsion. Once fully painted leave to dry for a minimum of 1 hour.

STEP 3

Once the Crackle Basecoat is dry apply a coat of emulsion in a second colour. For the best crackle effect this coat of emulsion should be applied at right angles to the first coat of emulsion and the Crackle Basecoat. This should be applied as quickly as possible because the crackling starts almost immediately.

STEP 4

When you are happy with the crackle finish, leave this over night and then apply the Rust-Oleum® Crackle Topcoat which seals and protects the crackle effect. Leave the Crackle Topcoat to dry for 2-4 hours.

Tip

A great tip is to practice the Crackle technique on a test piece a couple of times before you start your project to perfect the effect.
