# Gas and electrical regulations

CE marking on a product is the manufacturer's declaration that the product complies with relevant conformity requirements of applicable European legislation. The UKCA mark is the UK's new symbol to show that products comply with applicable UK regulations.

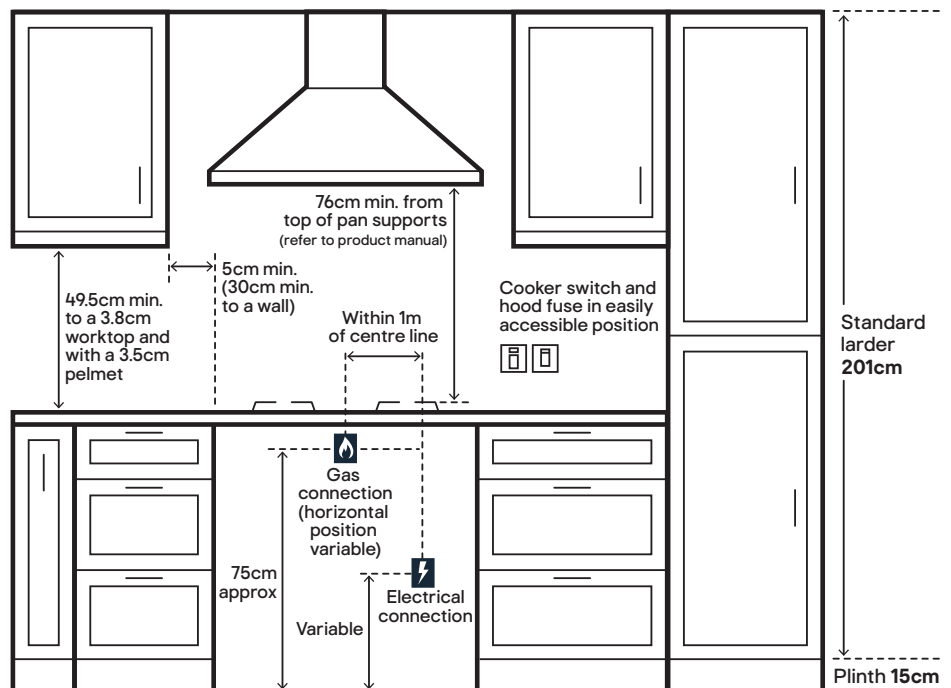

Choosing an NICEIC or ELECSA registered contractor is a householder's best way to ensure the job is carried out safely. Electricians registered with NICEIC and ELECSA are assessed on a regular basis to ensure high standards and their work is checked against the IET Wiring Regulations, as well as other standards.

Any gas work must be carried out by a Gas Safe registered engineer.

**Minimum height 216cm**  
Standard larder, including 15cm plinth, without cornice or pelmet

## Remember

- Hobs should have a minimum of 30cm work surface either side (ideally 40cm either side of an electric hob and 50cm either side of a gas hob)
- Ovens shouldn't be located near entrances or where there is through traffic
- Electrical sockets can't be fitted within 30cm of a sink
- Ovens should be separated from adjacent walls or end panels by at least 30cm
- Gas hobs can't be fitted within 30cm of any window and electric hobs within 5cm.

GoodHome is our product brand. It is a seal of quality, innovation and excellence. A number of existing products branded Cooke & Lewis have garnered great customer feedback and passed all our assessment criteria. They have therefore won the right to move under the GoodHome brand, but are still being supplied under their original Cooke & Lewis packaging for a short period because true to our sustainable ambition, we do not believe in throwing away perfectly good packaging.
