HOW-TO CREATE A SHABBY CHIC LOOK

with Rust-Oleum® Chalky Finish Furniture Paint

Select your furniture

Rust-Oleum® Chalky Finish Furniture Paint is perfect for all furniture types, old and new - whether it's a piece you already own or a second-hand find.

Paint your furniture

Apply your chosen colour by brush, roller or spray. When using the brush paint, achieve a no brush mark, flawless finish with a mini foam roller.

Distress the finish

For a shabby chic look, wait until the paint is dry, then dampen a cloth and rub away the paint on the edges and details to reveal sections of the original finish. Remove the paint in areas that will naturally get knocked and worn for an authentic look.

Add the finishing touch

Protect the finish with clear Rust-Oleum® Furniture Finishing Wax for a vintage feel or clear Rust-Oleum® Furniture Lacquer for a harder wearing finish. Consider replacing handles and knobs to complete the look.

HOW-TO CREATE A CRACKLED EFFECT

with Rust-Oleum® Crackle

Step 1

Ensure the surface of the object you are painting is smooth, clean and suitably primed if needed. Apply your first colour of vinyl matt emulsion. Always use water based emulsion paints for the overall effect to work properly. The first coat of emulsion should be brushed out and laid off in one direction as this determines the directional lines in the crackle.

Step 2

Leave the first coat of emulsion to dry. Stir the Rust-Oleum Crackle Base Coat then brush this on in the same direction as your first coat of emulsion. Cover your object thoroughly then leave it to dry for a minimum of 1 hour.

Step 3

Apply your second coat of emulsion. This should be applied as quickly as possible because the crackling starts almost immediately. A great tip is to practice this technique on a test piece a couple of times before you start your project. For the best crackle effect the second coat of emulsion should be applied at right angles to the first coat of emulsion and the crackle base coat.

Step 4

When you are happy with the finish, leave this over night and then apply the crackle top coat which seals and protects the crackle effect. Leave the top coat to dry for 2-4 hours.

TIP: Don't overwork the top coat – apply it in one pass of the brush only. If you make a mistake, don't panic – just wash off the second coat of emulsion and the crackle base coat with a damp cloth before it dries and start over.

A white cabinet with a marble top, decorated with books, vases, and gold accents. The cabinet features a white panel with a recessed rectangular design. The top surface is a light-colored marble with subtle veining. On the left, a tall, clear glass vase holds dried red flowers. Next to it is a small, round, gold-colored bowl. In the center, a stack of books is displayed, including 'VOGUE the gown' and 'THE KINFOLK ENTREPRENEUR'. To the right of the books is a small, gold-colored, cylindrical container. Further right is a tall, thin, gold-colored vase holding a single white candle. On the far right, a large, clear, faceted glass sphere sits on a gold-colored base. The background is a plain, light-colored wall.
